

Fomalhaut

This figure is a star map showing a field of stars. A dashed line, likely representing a galactic plane or a specific survey boundary, runs diagonally from the upper left to the lower right. The stars are represented by black dots of varying sizes, indicating their magnitude. The star Fomalhaut is specifically labeled with a larger black dot and the text 'Fomalhaut' next to it. The overall distribution of stars is sparse, with a few brighter stars (larger dots) scattered across the field.
