

A star chart of the constellation Canis Major. The chart shows several stars of varying sizes and symbols. A vertical dotted line with cross markers runs through the center. Stars are labeled with their names and symbols: Procyon (large black circle), Sirius (large black star), Betelgeuse (large black circle), Rigel (large black circle), Hyades (large black circle), and Pleiades (small black circle). Other stars are represented by smaller black circles. The text '< 3.50 mag' is located in the bottom right corner.

● Procyon

● Betelgeuse

● Hyades

● Pleiades

★ Sirius

● Rigel
