

A star chart of the constellation Orion. The chart shows several stars of varying sizes and symbols. A vertical dashed line with cross markers passes through the stars Procyon, Sirius, and Betelgeuse. Other stars shown include Rigel, Saiph, and the Hyades and Pleiades clusters. The stars are labeled with their names: Procyon, Sirius, Betelgeuse, Rigel, Hyades, and Pleiades. The star Sirius is marked with a six-pointed star symbol, while others are marked with solid circles of different diameters. The chart is oriented with Orion's belt stars (Betelgeuse, Saiph, Rigel) forming a vertical line.

● Procyon

● Betelgeuse

● Hyades

● Pleiades

● Rigel

★ Sirius
