

A star chart showing the constellation Regulus and Denebola. The stars are represented by black dots of varying sizes. The star Regulus is the largest dot in the center, and Denebola is a large dot to the left. A dotted line with cross markers runs diagonally from the top left to the bottom left. A small asterisk is located to the right of Regulus. The text '< 4.50 mag' is in the bottom right corner.

● Denebola

● Regulus

< 4.50 mag
