

● Procyon

The image is a star map on a white background. It features several stars represented by different symbols: a large black circle for Procyon, a black eight-pointed star for Sirius, and a large black circle for Rigel. A dashed line with cross markers runs diagonally from the top right towards the bottom right. Other stars are shown as small black dots. The labels 'Procyon', 'Sirius', and 'Rigel' are placed next to their respective symbols and are rotated to follow the orientation of the stars.

★ Sirius

● Rigel
